Detailed Action

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 4-12, drawn to a composition, classified in class 424, subclass 78.02+.
- II. Claims 2-3, drawn to methods, classified in class 424/514, subclasses various.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the method as claimed can be practiced by different products, such as, injection of vasodialotors or surgical implantation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1619

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Clark on October 22, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
